GSX Pro Profile for LIPZ Venice Marco Polo Airport by BEAUTIFUL MODEL OF THE WORLD

Summary:

The following gates have been fully customized for GSX Pro.

- Gate **322** (Medium, jetway, custom parking, no custom pushback yet)
- Gate **323** (Medium, jetway, custom parking, no custom pushback yet)
- Gate **324** (Large, jetway, custom parking, no custom pushback yet)
- Gate **325** (Large, jetway, custom parking, no custom pushback yet)
- Gate **326** (Large, jetway, custom parking, no custom pushback yet)
- Gate **327** (Large, jetway, custom parking, no custom pushback yet)
- Gate **330** (Large, jetway, custom parking, no custom pushback yet)
- Gate **360** (Medium, bus boarding, custom parking, no custom pushback yet)
- Gate **362** (Medium, bus boarding, custom parking, no custom pushback yet)
- Gate **361** (Medium, bus boarding, custom parking, no custom pushback yet)
- Gate **367** (Medium, bus boarding, custom parking, no custom pushback yet)
- Gate **217** (Medium, bus boarding, custom parking, no custom pushback yet)
- Gate **218** (Medium, bus boarding, custom parking, no custom pushback yet)

Features:

- Custom vehicle positions for every GSX vehicle on all customized gates at the airport.
- Custom PAX walking paths with barriers and non, according to how they're used in real life.
- Every stand has been tested in the Fenix A320, the PMDG 737-800, the Aerosoft CRJ700 and the Virtualcol E195, Large gates also with the 777-200, 767-400 and 777-300.
- Custom parking spots, precise stopping positions and marshallers at every stand.

How to install:

To install, simply extract the .zip file downloaded from flightsim.to and move the "lipz-b9hx5a.ini" file inside the following directory:

"Users\Username\AppData\Roaming\virtuali\GSX\MSFS"

In case you encounter any further issues or need help with the installation process, this video of "Easyjetsimpilot" very clearly and visually demonstrates how custom GSX profiles are to be installed correctly.

Known issues:

Due to the airport not having a custom AFCAD, the names of the gates inside of the GSX Pro menu differ from the ones on the sim map, the ground marking reflects the GSX Pro values correctly.

Custom pushbacks haven't yet been added, I'll update the file as soon as possible.
